# D23

## THE MOST VERSATILE INNOVATION.

With a length of just over 7 meters, the D23 redefines motor boating by combining innovation, efficiency and style. Its catamaran architecture allows for more agile, stable and efficient navigation.

Powered by a combustion engine, the D23 delivers exceptional performance without compromising its elegant and sophisticated design. This model offers a versatile solution for those who want to enjoy the sea with personality, without giving up the power and the performance of combustion propulsion.
